## 2ND INTERNATIONAL SYMPOSIUM ON CELLULOSE AND RENEWABLE MATERIALS

### SECOND ROUND OF NOTIFICATION

September 20-23, 2024 Chengdu, China

## Introduction

We are delighted to invite you to participate in the 2nd International Symposium on Cellulose and Renewable Materials (ISCRM), scheduled for September 20-23, 2024, in Chengdu, China. Hosted by the Chinese Chemical Society, ISCRM serves as a triennial gathering of scholarly minds. The first-session symposium in 2021, held in Wuhan, China, successfully blended online and in-person participation, reaching a global audience through live broadcasts.

This upcoming symposium is a joint effort led by the Division of Cellulose and Renewable Materials of the Chinese Chemical Society, in partnership with Sichuan University and the State Key Laboratory of Polymer Materials Engineering. The conference will focus on the latest scientific and technical advancements in cellulose and renewable materials, drawing together universities, research centers, technological institutions, companies, and individuals passionate about these subjects. It will showcase the most recent progress and achievements in cellulose science and technology, providing a valuable platform for scientific and technical professionals in related fields to connect.

We warmly invite esteemed scientists, engineers, and students active in cellulose and renewable materials to join us, contributing to enriching the event through face-to-face scholarly interactions.
